YourTimes Monthly and the Save Water Alliance

# Petition

**To the Honourable, Premier of New South Wales, Mr Morris Iemma M.L.A., the Speaker and Members of the Legislative Assembly, of New South Wales in Parliament assembled.**

1 We, the undersigned, being residents of the Goulburn and Kiama electorates, wish to strongly object to your government's plan to extract 15 billion litres of groundwater annually from the Southern Highlands (Kangaloon) Aquifer.
2 Our objections are on the ground that this extraction will only provide Sydney with a maximum of 10 days water supply, which is not a long term solution to Sydney's water problems. Furthermore, it has the likelihood of causing widespread environmental damage, and an adverse economic effect on the local community.
3 We therefore humbly petition you to immediately adopt the five-year moratorium on the pumping of groundwater from the Kangaloon Aquifer as called for by the Upper Nepean Groundwater Community Reference Group. This would enable the proper scientific and environmental baseline studies to be completed.
